According to the National Renewable Energy Laboratory (NREL), an average-sized solar panel system can save homeowners up to 80% on their utility bills.

For example, paying \$150 monthly for electricity could be reduced by \$120 after installing a solar system. Over a year, those savings amount to \$1,440, which is no small number. How much do solar panels save?

How much you actually save depends on many factors, including your power usage, local electricity rates, the size of your system, and how your utility bills solar customers. The average 6 kW solar panel system installed anywhere in the country will save you about \$1,500 on your electricity bills annually.

Will a solar system save you money?

While you will see immediate savings on your first power bill after installing a solar system, your overall net savings will become apparent after several years of use—after the savings on your power bill have paid for the upfront costs of the panels and installation.

How much does a 6 kW solar system save?

The average 6 kW solar panel system installed anywhere in the country will save you about \$1,500 on your electricity bills annually. Solar savings are very real, but exactly how much you save depends on the availability of local, city, and state incentives.

Can solar panels save you money on electric bills?

When you multiply that by the national average electricity rate of \$0.14 per kWh, you'll find that the typical American family has a monthly electric bill of around \$125. This means if enough solar panels were installed to cover this electricity usage, the average household could save almost \$1,500 a year on electric bills!

Can a solar loan save you money?

Solar loans can provide immediate energy cost savings by replacing your electricity bill payments with lower solar loan payments. However, in the long run, the interest reduces how much you can save with solar panels.

Are solar panels a good investment?

With electricity prices surging, going solar is a no-brainer in terms of saving money. Solar panels save you money by replacing your electricity bill with lower monthly solar payments. Over time the 25-plus year life of a solar system, often adds up to tens or hundreds of thousands of dollars in energy

cost savings.
