

## Overview

---

Solar roof tiles typically range between £13,000 and £16,200 for the average-sized home in the UK (2-3 bedrooms), which requires a 3kW to 4kW system. How much do solar roof tiles cost?

An average of 3.5 kW solar roof tile system will cost you £9,500. Information last updated in July 2024. By contrast, on average, 3.5kW worth of solar panels will set you back £7,026. But remember, you are also getting a new roof with your solar tiles, so direct price comparison is slightly misleading.

How much do solar tiles cost in the UK?

Solar tiles in the UK cost between £13,000 and £16,200 for the average home while regular solar panels can cost between £2,500 - £10,500. Solar roof tiles come in a variety of designs and can replace a standard roof, saving you money on electricity. The most popular solar tile providers in the UK are Tesla, GB-Sol, and Solecco .

Are solar tiles expensive?

Unlike traditional solar panels, solar tiles double up as a roof covering or roof tile replacement, so they will naturally be more expensive than bolting solar panels onto an existing roof. Solar tiles also require a longer, more complex installation, installed by roofers rather than PV installers, increasing costs.

Are solar-powered roof tiles right for your home?

Solar panels come in various configurations but one of the most interesting forms is solar tiles. Solar roof tiles can be an aesthetically pleasing alternative to a standard on-roof system but they also have their drawbacks, such as high prices and lower efficiencies. Let's explore whether solar-powered roof tiles are right for your home.

How much does a solar panel cost?

Solar panels and solar tiles are both sustainable ways to power your home.

They function in the same way, but their performance and price differs. The average cost of a 4kW traditional solar array is £7,000, whereas a solar tile system of the same wattage costs around £12,000, excluding installation costs.

Is it worth it to install solar tiles yourself?

The tiles are more expensive, up to double the price of solar panels, with the labour costs for installation a big chunk of that cost. So a DIY installation seems to make perfect sense.
