According to the National Renewable Energy Laboratory (NREL), an average-sized solar panel system can save homeowners up to 80% on their utility bills.

For example, paying \$150 monthly for electricity could be reduced by \$120 after installing a solar system. Over a year, those savings amount to \$1,440, which is no small number. How much do solar panels save?

How much you actually save depends on many factors, including your power usage, local electricity rates, the size of your system, and how your utility bills solar customers. The average 6 kW solar panel system installed anywhere in the country will save you about \$1,500 on your electricity bills annually.

Do solar panels save money on electricity bills?

The amount of money that you save on your electricity bills when you install solar panels depends on the size of the solar power system you install. Larger systems are able to collect more sunlight, thereby increasing the amount of electricity they produce.

Will a solar system save you money?

While you will see immediate savings on your first power bill after installing a solar system, your overall net savings will become apparent after several years of use—after the savings on your power bill have paid for the upfront costs of the panels and installation.

Are solar panels a good investment?

Solar panels are an expensive initial investment but provide significant savings on energy bills over time. Depending on your area's electricity costs, you could save between \$28,000 and \$120,000 over the lifetime of your solar panel system. The higher your local electricity prices, the greater your potential for solar savings.

How much does a solar panel system cost?

The cost estimate is based on a data set from the Lawrence Berkeley National Laboratory that puts the average solar panel system cost at \$3.67 per watt. Here's a look at the average cost of a solar panel system for most states, according to FindEnergy.com. The cost of individual solar installations can vary, however.

Can a solar loan save you money?

Solar loans can provide immediate energy cost savings by replacing your electricity bill payments with lower solar loan payments. However, in the long

run, the interest reduces how much you can save with solar panels.
