

How to become an agent for solar photovoltaic panels

Overview

There are a number of routes you can take to becoming one of the best solar panel installers around, but you'll need to be qualified as an electrician before you can specialise in solar panel installations. We've listed the two main ways you can get qualified below.

The cost of becoming a solar panel installer varies, depending on the courses you attend. For example, a City & Guilds Level 3 course in the Installation of Small Scale Solar Photovoltaic.

If you're starting from scratch, it can take between two and three years to become a fully qualified solar panel installer, as you'll need to spend about two years training as an electrician, plus added.

Lots of companies offer solar panel installer training – but you want to make sure you do a legitimate course that has authority behind it. If your end goal is to become an MCS-accredited installer, you'll need to sign up for one of.

The typical solar panel installer can earn anywhere between £17,000 and £36,000 per year. This salary range fluctuates depending on the hours you work, the company you.
