

# How to dispose of lithium batteries at home

## Overview

---

Keep batteries out of your regular recycling bin. Household batteries are.

Call to confirm lithium batteries are accepted and check for fees. Some collection sites only collect certain types of batteries, so check to make sure the site collects li.

Lithium and lithium-ion (or Li-ion) batteries are commonly used to power computers, cellphones, digital cameras, watches, and other electronics. Lithium-ion batteries are often rechargeable, while regular lithium batteries are usually single-use. Unlike alkaline batteries, lithium batteries are reactive and contain.

To dispose of lithium batteries safely, follow these steps<sup>12345</sup>: Do not throw them in the garbage or recycling bins. Take them to certified recycling centers, electronics retailers with battery takeback programs, or hazardous waste collection sites. Avoid placing them in regular trash. Contact the manufacturer for guidance. How do you dispose of lithium batteries?

To dispose of lithium batteries, you'll need to take them to a recycling center, which is easy to find online. Keep batteries out of your regular recycling bin. Household batteries are recycled separately from other items. Mixing batteries in with other recyclables can result in a fire, as the battery can spark.

Can you recycle a lithium battery?

Check for the word "lithium" marked on the battery. Do not put button-cell, coin, or lithium single-use batteries in the trash or municipal recycling bins. Check with [Earth 911.com](http://Earth911.com) to find a recycling location near you. These common batteries are made with lithium (Li) metal and are non-rechargeable.

What is the purpose of recycling lithium-ion batteries?

The purpose of recycling lithium-ion batteries is to avoid toxic electronic waste from clogging the landfills and to use the retrieved materials in the fabrication of new products. If you want to dispose of or recycle your old batteries, here are 4 steps you can take to safely recycle them.

Can you put lithium batteries in the trash?

Unlike alkaline batteries, lithium batteries are reactive and contain hazardous materials. For this reason, you should not put them in the trash. To dispose of lithium batteries, you'll need to take them to a recycling center, which is easy to find online. Keep batteries out of your regular recycling bin.

How do you dispose of a single use battery?

Every year in the United States, millions of single use and rechargeable batteries are bought, used and recycled or disposed of in the trash. Batteries come in various chemistries, types and sizes to fit their use. Single-use batteries can generally be removed from the device when they stop powering the device.

How do I recycle Li-ion batteries?

The only safe way to recycle Li-ion batteries is to have them processed by a qualified electric and electronic recycling center. For individuals, that means looking up your nearest center and dropping off any old phones, games consoles, laptops, or tablets. These will generally be accepted free of charge and recycled properly.
