

# **How to make cable bracket for photovoltaic power generation**

## Overview

---

What are the different types of PV brackets?

At present, there are 3 types of brackets used in most PV power plants: fixed conventional bracket, adjustable tracking bracket and flexible PV bracket. This refers to the mounting system where the orientation, angle, etc. remain unchanged after installation.

Why should you choose a PV bracket?

The choice of bracket directly affects the operational safety, breakage rate and construction investment of PV modules. Choosing the right PV bracket will not only reduce the project cost, but also reduce the post maintenance cost.

How do I choose a bifacial cable for a PV system?

Choosing cabling options for PV projects, especially bifacial ones, involves considering a number of variables. DC cables are PV system lifelines as they interconnect modules to combiner boxes and inverters. Plant owners must ensure the size of cable is carefully chosen for the current and voltage of the PV system.

What are the different types of solar power cables?

Let's explore the three primary types of cables integral to any solar power system: DC cables, AC cables, and Earthing cables. Function: DC cables are the frontline soldiers in a solar plant, directly connecting solar panels to the solar inverter. They carry the direct current generated by solar panels.

How to wire solar panels together?

Wiring solar panels together can be done with pre-installed wires at the modules, but extending the wiring to the inverter or service panel requires selecting the right wire. For rooftop PV installations, you can use the PV wire, known in Europe as TUV PV Wire or EN 50618 solar cable standard.

## How to add Solar connectors to PV wires?

The steps to add solar connectors to PV wires are the following: Strip the wire. Place the connecting plate on it and use the crimping tool. Insert the lower components of the connector (terminal cover, strain reliever, and compression sleeve). Insert the upper components (safety foil, male/female MC4 connector housing, O-ring).
