

How to manually store battery in power cabinet

Overview

How do you store a lithium ion battery?

In general lithium-ion batteries should always be removed from the devices they power and stored at 60-70% of the pack's capacity. If a battery will go unused for three more days, it should be stored in a cabinet or larger store. Once disconnected, storing lithium-ion batteries follows similar principles as the correct storage of chemicals.

How do you keep lithium batteries safe?

Make sure your lithium-ion batteries are kept out of children's reach by keeping them in a secure location. Keep the battery and charger apart and in a temperature range of 5 to 40 degrees Celsius. **Is it Safe to Store Lithium Batteries in the House?**

Storing lithium batteries in the House is generally safe when proper precautions are taken.

How do you store batteries in a garage?

If necessary, clean the batteries of dirt and grime with a moist cloth. Keep the batteries somewhere dry and out of the sun—in a closed box, for instance. Temperature requirements: dry basements, garages, or well-insulated sheds are good places to store batteries since they keep them at a temperature between -10°C and 50°C.
