Overview

To start your generator: Review your owner's manual to ensure familiarity with your generator's controls and operation. Move the generator outside. Check the fuel level and add more fuel if necessary. Check the oil level and add oil if necessary. Check the air filter and clean if necessary. Turn the circuit breaker off. How do you start a generator on a Honda Accord?

Also consider a few tips when getting started: Turn the fuel tank cap vent lever to its "on" position and set the eco-throttle to "off." Next, place the choke lever in its "closed" position and turn the engine switch on. Finally, simply pull the starter grip repeatedly until the generator starts and stays on for an extended period of time.

What should I do if my Honda generator is not working?

Fuel filter restricted, carburetor malfunction, ignition malfunction, authorized Honda servicing dealer, valves stuck, etc. or refer to the shop manual. ENGINE LACKS POWER Possible cause Correction Air filter restricted. Replace or repair power tool or appliance. Stop and restart the engine. Faulty generator.

Where can I find a Honda generator parts catalog?

Visit peparts.honda.com for free online access to the parts catalog. It is also available for purchase in paper form through your Honda dealer. Accessories Catalog Your authorized Honda Power Equipment dealer offers a wide selection of accessories (optional equipment) to make your generator even more useful.

Can a Honda power equipment dealer repair a generator?

Remember that an authorized Honda Power Equipment dealer knows your generator best and is fully equipped to maintain and repair it. To ensure the best quality and reliability, use only new, Honda Genuine parts or their equivalents for repair and replacement.

What kind of maintenance does a Honda generator require?

These videos provide step by step directions on performing basic maintenance on your Honda generator, including oil changes, cleaning the air filter, and spark plug replacement.

How do you lubricate a Honda generator?

All Honda generators are shipped and sold without any oil, which means a lubricant must be added to engine before the equipment is used for the first time. Simply remove the side panel and then remove the oil cap and dipstick. Fill the oil compartment to the appropriate level on the dipstick using a standard SAE 10W-30 oil.
