

How to string lights with photovoltaic panels

Overview

To connect battery and solar charge controller, you'll need appropriately sized wire, wire connectors, and fuses. To make this part easy, I used a 12V plug adapter called the NOCO GC018 rather than make my own battery cables.

Next, I needed to insert the solar panel wires into their screw terminals on the solar charge controller. My solar panel's wires came with stripped wire ends, making this step super easy for me. If your solar panel comes with.

I first tested the lights by turning them on: Lights — check. Tip: If your lights aren't turning on, cover your solar panel with a blanket and try again. Then I tested that my solar panel, battery.

I located the USB port on my solar charge controller. Then I plugged the lights into the port. Yep — it's that easy. Now my DIY solar string lights are complete! Here's the complete setup at this.

DIY Solar String Lights: 5 Steps (w/ Photos) Step 1: Connect the Battery to the Solar Charge Controller . Step 2: Connect the Solar Panel to the Solar Charge Controller . Step 3: Connect the LED String Lights to the Solar Charge Controller . Step 4: Test Your Solar String Lights . Step 5: Hang Your Lights
