

# Hybrid solar inverter tender price in Chile 2030

## Overview

---

Will Enel Chile start a solar power plant in 2022?

September 2022: Enel Chile got authorization from the National Electric Coordinator to commence commercial operation of its Sol de Lila solar power facility, which has an installed capacity of 161 MW, through its renewable energy development company, Enel Green Power Chile.

Will solar power become the first source of electricity in Chile?

Additionally, according to a study by the Chilean Association of Power Generators, by 2030, solar power is expected to reach 30% of total installed capacity, becoming the country's first source of electrical energy. The increasing solar capacity and development of new projects are expected to drive the solar energy market in the forecast period.

How has the solar industry changed in 2021?

In 2021, the total renewable energy capacity of Chile accounted for 14890 MW, with an annual growth rate of 18%. The solar industry has cut costs dramatically in the past few years through economies of scale. As the market was flooded with equipment, prices plummeted, and the cost of solar panels has been dropping exponentially.

Will Solek build a solar power plant in Chile?

February 2022: Solek Group signed a framework agreement to construct solar projects in Chile with its Chilean affiliate, Solek Latam Holding. Solek will be able to develop up to 28 solar (PV) power plant projects with a combined capacity of up to 200 MW under the terms of the agreement.
