

Hyperbrick macbook pro backup power

Overview

What is the best UPS battery backup for Mac?

Whether you're in the office or on the road, don't be left without power when you need it most. These best UPS battery backups for Mac are a great way to keep your devices running, even if you have a temporary power outage. My favorite is the Ecoflow EFDELTA Portable Power Station because of its easy portability and powerful reliability.

Do you need a battery backup for your Mac?

Reliable power for your Mac isn't just a nice idea, it's a necessity. Power spikes and outages can hurt your beloved Mac - potentially damaging your computer and causing data loss from your hard drive. I've talked about the importance of battery backups before, and now I'm doing it again.

How do I connect my HyperMac battery to my laptop?

To use the battery with your laptop, you connect one end of the included MagSafe cable to the HyperMac battery's DC Out jack, and the other end to your MacBook; as long as there's a charge left in the HyperMac battery, your computer thinks it's connected to AC power.

How do I get a battery backup on my Mac?

Enter information about your Mac. Whenever I need a new battery backup, I start by paying a visit to APC's UPS Selector Web page. The site asks for information about your computer setup, like what processor your Mac has, how big your display is, and what peripherals you plan on using.

How much battery does a 13 inch MacBook Air have?

A 13-inch MacBook Air has a battery capacity of around 50Wh. The 16-inch MacBook Pro's battery is rated at nearly twice that—just under 100Wh. To find out the Wh rating of your MacBook, check our our list of all the MacBook battery capacities. In theory, a 100Wh power bank could recharge the smaller

laptop twice and the larger one once.

Why should you buy a HyperMac battery?

Three features make the HyperMac batteries especially appealing. First, each battery can actually charge your laptop's internal battery—not just provide operating power—during use. Second, the batteries support Apple's dual-voltage power system, automatically switching as needed.
