

# **Indians make their own solar panels**

## Overview

---

Can India make its own solar panels?

Villagers assemble solar lamps as part of India's Barefoot solar project. Credit: Rebecca Conway/Getty Most of the solar photovoltaic panels used in India are currently imported from China, Konda says. But given the geopolitical tensions between the two nations, the Indian government is keen to end that reliance by making its own solar panels.

Who makes solar modules in India?

Current Indian companies producing solar modules include Waaree, Adani Solar, Vikram Solar, Goldi, and RenewSys. Notably, by 2025, India is projected to be the largest module producer outside of China. Yet, India largely relies on imports of solar cells and components from China to make its solar modules.

How many solar modules are produced in India?

In March 2023, India had 38 GW of production capacity for solar modules, comprising approximately 3 percent of the global production capacity. Current Indian companies producing solar modules include Waaree, Adani Solar, Vikram Solar, Goldi, and RenewSys. Notably, by 2025, India is projected to be the largest module producer outside of China.

Does India have a solar power grid?

However, India has a largely open-access regime with its power grid, which means solar-related manufacturers can opt to buy renewable energy directly from the grid (or build their own renewable energy generation) and lower their carbon emissions.

Can India compete with China to make solar panels?

Faced with an accelerated solar build-out, the Indian government has set out to compete with Chinese solar cell and panel imports to meet its needs with made-in-India technology. And the state of Gujarat - one of the most solar-

developed in the country – is at the heart of India’s – and Adani’s – solar manufacturing efforts.

Which Indian companies are planning to build integrated solar PV production facilities?

Already, the Indian companies Indosol Solar (a special purpose vehicle of Shirdi Sai Electricals), Reliance New Energy Solar, Adani Infrastructure, and FS India Solar Ventures intend to build integrated solar PV production facilities, which encompass production from the polysilicon to the modules.
