

# **Install your own off-grid solar power**

## Overview

---

Designing your own self-sufficient solar power system must start with your end user's needs in mind. Making the effort to follow a proper design process saves you money, time, and makes the process of going off the grid a pleasant one. Here is an overview of the steps I'll take you through over the course of this three part guide.

In order to accurately determine how big of a solar system you need, the first thing you need to do is determine how much energy you are using.

While the go to place to put solar panels on the roof, roofs are very frequently not the best place to put your solar panels. There are three reasons why I don't recommend putting solar.
