

Installation direction of Chint photovoltaic panel base

Overview

Where can I find the Chint power systems user manual?

The manual will be periodically updated or revised due to the product development or improvement. The latest version of this manual can be acquired via the website at **1. IMPORTANT SAFETY INSTRUCTIONS (SAVE THESE INSTRUCTIONS)** Please read this user manual carefully before installation of the inverter.

How do I install a PV inverter?

Ensure there is no electrical connections around ports of the PV inverter before installing; Adequate ventilation must be provided for inverter installation location. Mount the inverter in vertical direction, and ensure that no object is put on the heat sink affecting the cooling. (For details, refer to Chapter 4 Installation).

What is a photovoltaic (PV) inverter user manual?

This user manual is intended for photovoltaic (PV) inverter operating personnel and qualified electrical technicians. This user manual is subject to change (specific please in kind prevail) without prior notice. Indicates an imminently hazardous situation which, if not correctly followed, will result in serious injury or death.

How to connect a PV module to a DC inverter?

PV modules generate electric energy when exposed to sunlight and can create an electrical shock hazard. Therefore, when connecting the PV modules, shield them with opaque cloth. Before connecting DC input power cables, ensure that the voltage on the DC side is within the safe range and that the DC SWITCH on the inverter is OFF.

How to install a CPS inverter?

290.0 (11.4in.) 1. Hang the inverter onto the mounting bracket as shown in

Figure 3-6; Manual mounting: One person can safely lift the inverter and mount it onto the bracket. The main enclosure of the CPS inverters is 22kg (48.5 pounds). 2. Install the wire-box: Remove screws securing the bulkhead cover at the top of the wire-box.

How to mount solar modules?

Figure h Figure i Especially for Figure e ,f and g mounting method, the modules may be mounted using clamps designed for solar modules refer to Figure j, the modules must be supported along the length of the edge, and should overlap the array rail by 10mm - 14mm Figure j Electrical Installation 4.1 Installation Condition.
