Overview

Which home generator should I buy?

We researched the options and spoke with several experts to select the best home generators you can buy, including our best overall choice, the Briggs and Stratton PowerProtect 26kW Home Standby Generator, chosen for its versatility, power, and reliability.

Can DIYers hook up a generator to a house?

DIYers shouldn't hook up a generator to a house; whole-home generators need to be installed by licensed contractors. These devices create a lot of power and have to tie into the home's fuel source and electrical panel to be operational. It's a potentially dangerous project that takes trained professionals.

What type of generator do I Need?

A standby generator, like the Generac Guardian 24kW Home Generator, is the most common option for whole-home generators since it offers average power outputs ranging from 10,000 to 24,000 watts. This generator type is permanently installed outside the home and is connected to a propane fuel tank or natural gas line.

Who installs a Generac home backup generator?
