

Installing photovoltaic panels using a telescopic ladder

Overview

What is a solar panel ladder?

Solar Panel Ladder has been designed to offer a safe, practical way of working when installing or maintaining solar panel arrays. Bridging ladder provides 23 cm clearance from the roof to the underside of the stile, allowing plenty of work space, and up to 4.6 m free span over the roof.

How do I contact solar panel ladder?

Order hotline and friendly advice. Call: 01452 520 144 Easy and safe access over solar panels during installation and maintenance. Solar Panel Ladder has been designed to offer a safe, practical way of working when installing or maintaining solar panel arrays.

What is a solar bridging ladder?

Ideal for repairs, inspection and maintenance, The Solar Bridging Ladder makes it easier to safely reach the solar panels once on the roof. Its three-part design is lightweight and easy to use. The CoverSafe Spark provides protection when working in loft spaces, especially for installing solar inverters.

How does a solar panel installation platform work?

The solar panel installation platform can be transported easily in a transit van or on a roof rack, and it assembles within minutes. Its lightweight construction also allows the platform to be lifted and shifted around the worksite without disassembly, making it ideal for projects that require flexibility.

How long does it take to install a solar access system?

Compared to traditional scaffolding systems (which can take days to set up and dismantle), Easi Dec platforms take less than an hour to install and remove. Our solar access systems are designed as an alternative to scaffolding, offering a safe means of accessing the roof for solar panel work,

such as installation or maintenance.

How do you lift solar panels to the roof?

I finished installing my DIY solar system grid tie 7.1KW on th end of 2019, but I want to share with you guys the methods I used to lift the panels to the roof. For the first 16 panels I run a steel cable between two tall trees over the top of the house. Used a pulley system to lift it and move the panel to the roof. You can see it on this video:

Installing photovoltaic panels using a telescopic ladder

Clause 10.2 Solar Photo-Voltaic (PV) Installation

(1) For access to PV installations on the roof (excluding non-PV areas), at least one exit staircase shall be provided. Where the area is large and one-way travel distance to the exit cannot be met, an additional cat ladder or ship ladder ...
