International technology roadmap for photovoltaics

Overview

The International Technology Roadmap for Photovoltaic (ITRPV) is a yearly report that provides the photovoltaics (PV) community with projections of the development of key value chain items such as materials, processes, and products¹. The aim of the ITRPV is to inform suppliers and customers about anticipated technology trends in the field of crystalline silicon (c-Si) photovoltaics and to stimulate discussion on required improvements and standards². The ITRPV is considered a guideline for the entire c-Si photovoltaic supply chain³. What is the International Technology Roadmap for Photovoltaics (ITRPV)?

The aim of the International Technology Roadmap for Photovoltaics (ITRPV) is to inform suppliers and customers about anticipated technology trends in the crystalline silicon (c-Si) based PV industry and to stimulate discussions on required improvements and standards.

What is a photovoltaic technology roadmap?

11. Imprint 12. Sponsors 1. Executive Summary The photovoltaic (PV) industry needs to provide power generation products that can compete with both, conventional energy sources and other renewable sources of energy. An international technology roadmap can help to identify trends and to define requirements for necessary improvements.

What is ITRPV – crystalline silicon PV technology roadmap?

The results in the report are median projected values from filled questionnaires' of professional expectations. The ITRPV is by far the main PV roadmap among existing ones which focuses mainly on projected topics for crystalline silicon PV technologies with different technology readiness levels .

When will the VDMA sector group photovoltaic equipment release the roadmap?

As part of the publication, the VDMA Sector Group Photovoltaic Equipment will present the key messages of the roadmap in a web seminar on April 14, 2022.

More information on the planned web seminar is available [here](#). Optimized PV system components remain key for boosting PV's competitiveness.

What is the purpose of a PV roadmap?

The objective of the roadmap is not to recommend detailed technical solutions for identified areas in need of improvement, but instead to emphasize to the PV community the need for improvement and to encourage the development of comprehensive solutions.

What is the Roadmap for silicon solar cell development?

Generally speaking, the roadmap for silicon solar cell development calls for the introduction of passivating contacts to the mainstream high-volume production of PV devices, then a possible switch to n-type material and finally the introduction of tandem cells. Below we describe challenges for the different technology classes.

International technology roadmap for photovoltaics

Historical market projections and the future of silicon solar cells

The International Technology Roadmap for Photovoltaics (ITRPV) annual reports analyze and project global photovoltaic (PV) industry trends. Over the past decade, the silicon PV manufacturing landscape has undergone rapid changes. Analyzing ITRPV reports from 2012 to 2023 revealed discrepancies between projected trends and estimated market shares. ...

International Technology Roadmap for Photovoltaic (ITRPV) ...

Photovoltaic Equipment International Technology Roadmap for Photovoltaic (ITRPV) Workshop: - Results of 10th Edition of International Technology Roadmap for Photovoltaic (ITRPV) - How do automatization concepts, in-situ quality control and machinehelp to

ITRPV

The International Technology Roadmap for Photovoltaics (ITRPV) is updated regularly by the VDMA Photovoltaics Equipment Sector Group with contributions from leading international crystalline silicon producers, wafer suppliers, cell manufacturers, module

International Technology Roadmap for Photovoltaic (ITRPV): R

The 13th edition of the International Technology Roadmap for Photovoltaic (ITRPV) will be available for download from April 14, 2022. With

the help of 62 international ...

The International Technology Roadmap for Photovoltaics and the

The International Technology Roadmap for Photovoltaics (ITRPV) is a leading roadmap in the PV community. Ever since its first edition has been published in 2010, the ITRPV has succeeded to provide the technology projections in crystalline silicon PV technology covering a wide scope in the PV value chain. The projection data obtained from contributing experts and institutions are ...

The International Technology Roadmap for Photovoltaics and the

The International Technology Roadmap for Photovoltaics (ITRPV) is a leading roadmap in the PV community. Ever since its first edition has been published in 2010, the ITRPV has succeeded to provide the technology projections in crystalline silicon PV technology covering a wide scope in the PV value chain. The projection data obtained from contributing experts and ...

International Technology Roadmap for Photovoltaics (ITRPV)

aim of the International Technology Roadmap for Photovoltaics (ITRPV) is to inform suppliers and customers about anticipated technology trends in the crystalline silicon (c-Si) based PV ...

International Technology Roadmap for Photovoltaic (ITRPV)

The aim of the International Technology Roadmap for Photovoltaic (ITRPV) is to inform suppliers and customers about anticipated technology trends in the field of crystalline silicon (c-Si) ...

International Technology Roadmap For Photovoltaics

The document discusses the 8th edition of the International Technology Roadmap for Photovoltaics (ITRPV). It provides an outline of the topics to be covered, including an introduction to ITRPV, PV learning curves and cost ...

International Technology Roadmap for Photovoltaic (ITRPV)

International Technology Roadmap for Photovoltaic (ITRPV) Results 2018 Tenth Edition, March 2019 2 EXECUTIVE SUMMARY Content 1. Executive summary 3 2. Approach 4 2.1. Materials 4 2.2. Processes 4 2.3. Products 4

[ITRPV 15th edition, March 2024](#)

ITRPV PV learning curve c-Si material trendsPage 6 , Spot Price calculation (year end values): mono-Si dominates, with increased share mono PERC : n-mono ? 0.12 \$ /Wp Price reduction at year end due to continued increased shipments No premiums for

[THE INTERNATIONAL TECHNOLOGY ROADMAP FOR ...](#)

The International Technology Roadmap for Photovoltaic (ITRPV) [1,2], first introduced in 2010 by SEMI PV group, provides the photovoltaics (PV) community with yearly reports projecting the ...

International Technology Roadmap for Photovoltaic (ITRPV)

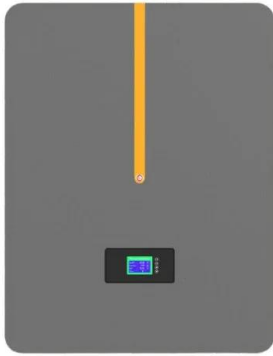

International Technology Roadmap for Photovoltaic (ITRPV) Results 2018 including maturity report 2019 Tenth Edition, October 2019 2 EXECUTIVE SUMMARY Content 1. Executive summary 3 2. Approach 4 2.1. Materials 4

[\[PDF\] International Technology Roadmap for](#)

TLDR. This paper examines the impact of changes to key PV module and system parameters on the levelized cost of energy (LCOE) and the impacts on the 2015 baseline LCOE due to ...
