

Is it cost-effective to install solar power for personal use

Overview

Current SEG rates are much lower than the retail price of grid electricity, so it's more cost-effective to use the energy you generate rather than sell it. Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Are solar panels worth it?

If you're ready to save some cash, while you help save the planet, take a look at the solar panel stats and weigh up the pros and cons of solar panels for yourself to see if they will be worthwhile. Solar panels are very energy-efficient and reduce reliance on the National Grid.

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.

Are solar panels a good investment?

Over the past decade, the cost of solar power has halved, making it a more attractive option for homeowners. With gas prices on a rollercoaster and climate change concerns mounting, solar panels are expected to become even more cost-effective in the future. After installation, solar panels start saving you money on energy bills immediately.

Should you consider solar panels as a home improvement?

It's also worth considering solar panels' value as a home improvement. Solar

panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result.

How much do solar panels save?

How much you'll save will depend on a number of factors including the type and size of solar panel array you have, your home's location, your energy consumption and, of course, the weather.
