

# Is it dangerous to install photovoltaic panels on a hillside

## Overview

---

Should I go solar with a ground-mounted solar panel installation?

Here's what to consider if you're thinking about going solar with a ground-mounted solar panel installation. The biggest advantage with ground-mounted solar panels is that they offer greater control over your solar panel direction and angle. Solar panels need to face either south or southwest to receive maximum direct sunlight.

Can you put solar panels on a roof?

Ground mounts are more common for certain types of solar systems, like off-grid setups. But they can be used by anyone if they have the space! There are other options if your roof isn't suitable for solar panels; you can also consider a solar carport, a solar patio, or even a solar tree!.

Are photovoltaic solar panels safe?

The risks associated with the use of renewables are often overlooked and this poses serious problems for insurers. However, we are keen to support our customers and to provide guidance on how photovoltaic solar panel systems can be installed and used safely.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels.

Can solar panels be installed on a hill?

Panels installed on rolling hills follow the contours of the land, but technically remain flat relative to the ground. Schrock has witnessed installers working on 20 and 30° slopes, but with much difficulty. SunModo installed a residential ground-mount solar array into a hillside. SunModo.

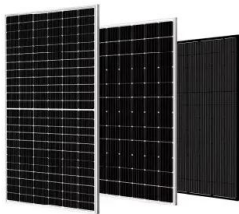

Are ground-mounted solar panels better than a slanted roof?

The biggest advantage with ground-mounted solar panels is that they offer greater control over your solar panel direction and angle. Solar panels need to face either south or southwest to receive maximum direct sunlight. On flat ground, you can position solar panels in any direction you want to maximize sun exposure, unlike on a slanted roof.
