## Overview

---

I strongly urge you to avoid using any adhesive for solar panels. Keep in mind that flexible solar panels don't last long. You will probably need to replace them every couple of years. Can you use adhesive on solar panels?

I strongly urge you to avoid using any adhesive for solar panels. Keep in mind that flexible solar panels don't last long. You will probably need to replace them every couple of years. That will be a challenge with them glued in place. For rigid panels, the best adhesive would be M6 bolts.

What adhesive do you use for flexible solar panels?

Suitable adhesives for mounting flexible solar panels include polyurethane sealant, adhesive sprays, and strong double-sided tapes. Some reputable adhesive brands for solar panel installations are Sikaflex-221, 3M Hi-strength 90 spray, and 3M VHB industrial adhesive tapes. How do you secure flexible solar panels without drilling?

.

Are solar adhesives weather resistant?

Weather resistance is a primary concern with the adhesives used to install solar panels, so solar manufacturers and installers should investigate how long the adhesives are going to last in the harsh conditions of a typical solar installation. An introduction to solar adhesives from our 2012 Renewable Energy Handbook.

Do thin film solar panels need adhesive?

Thin-film solar panels (see page 296), in particular, need adhesives around the edges because they typically don't have frames to protect them. They need an additional moisture barrier called a side or edge seal. Many manufacturers use butyl, either in a liquid or tape form. Butyl-casting resins provide water vapor-tight sealing.

Which solar panel adhesive should I use for my RV?

I personally recommend the Sika flex 252 for numerous different situations, and securing your flexible solar panels to your RV's roof is one of them. I also recommend using the Sika flex 212 product range as it is specifically formulated and advertised as a flexible solar panel adhesive.

Does 3M adhesive work on flexible solar panels?

3M also has an adhesive spray that works well for fixing flexible solar panels. It's the 3M Hi-Strength 90 Spray, which can bond metal and flexible panels. It's advertised as extremely strong, and it's easy to use as a spray. Remember that it is crucial to have both surfaces perfectly cleaned before applying any glue or adhesive to them.
