

# **Is it okay to install photovoltaic panels in the sun room**

## Overview

---

No. Solar panels don't need direct sunlight to harness energy from sun, they just require some level of daylight in order to generate electricity. Can solar panels be installed on a roof?

Your installers will usually need to erect scaffolding to install solar panels on your roof. Once this is up, solar panels can be installed in a day or two. The inverter will usually be fitted in either a loft or garage. This converts the DC your panels produce to AC that you can use in your home.

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.

How much space do solar panels need?

Alan Duncan, of Solar Panels Network, adds that solar panels need the right

amount of space for installation (typically the average household will need 1.4m<sup>2</sup> per solar panel, roughly 22 □ for 12 panels), and how not all roofs will be suitable; thatched roofs, for example, won't be suitable for solar panels.

Do solar panels need direct sunlight?

No. Solar panels don't need direct sunlight to harness energy from sun, they just require some level of daylight in order to generate electricity. That said, the rate at which solar panels generate electricity varies depending on the amount of direct sunlight and the quality, size, number and location of panels in use.
