

Is it worth using solar power

Overview

Are solar panels worth it?

If you're ready to save some cash, while you help save the planet, take a look at the solar panel stats and weigh up the pros and cons of solar panels for yourself to see if they will be worthwhile. Solar panels are very energy-efficient and reduce reliance on the National Grid.

Is going solar worth it?

Well, the answer is yes. Going solar is worth it because you can expect significant savings on your yearly electricity bills (up to £1,005) and cut your carbon footprint by almost a tonne in pollution for the average solar panel system.

Is solar energy a good investment?

And the more solar energy you consume, the more you save on your electricity bills and the faster you make your money back on the investment. The flip side of being home all day means that you won't have as much surplus energy to sell back to the National Grid.

How much do solar panels save?

How much you'll save will depend on a number of factors including the type and size of solar panel array you have, your home's location, your energy consumption and, of course, the weather.

Do solar panels increase property value?

Solar panels are attractive to potential new homeowners when you next sell your home, which can increase your property value as a result. That might seem like a long time, but it's worth remembering that solar panels can provide all of your energy needs, making your home potentially energy self-sufficient.

Is it worth getting solar panels in the UK?

It's definitely worth getting solar panels in the UK. The UK isn't especially sunny, but it receives more than enough daylight to save households hundreds of pounds per year on their electricity bills - and what you don't use, you can sell to the grid.
