

Jet solar

Overview

Why should you choose jet solar?

Jet Solar offers high-efficiency locally manufactured panels that compete with the local and international products, using an automated European production line, and relying on human resources from the most efficient engineers and trained workers. Have any questions?

.

Is jet solar a good company?

Well done Jet Solar; you deserve my full recommendation and a 5 Star rating. The quote is clear and easy to understand, Adam is so nice to explain everything to us. The installation went really smoothly and efficient. The outcome is amazing. Paul and his team members are so nice, and explained every details to us.

Who is jet solar?

At Jet Solar, we bring extensive expertise and commitment to every project. Our director, Jason Dickinson, has been in the solar industry for 15 years, overseeing around 2000 installations. This level of experience allows us to design and implement customised solar systems that maximise efficiency and savings for our clients.

What is a solar jet?

Solar jets are bursts of plasma coming off the Sun. Studying solar jets contributes to better understanding of our closest star, the Sun, and how its energy impacts conditions on Earth. The new Solar Jet citizen science project is led by researchers at the University of Minnesota, with support from NASA. From the science team's press release:.

How does jet solar work?

Jet Solar installs panels, inverters, batteries and heat pumps. It exclusively uses products from trusted and reliable brands, while strictly avoiding the use of sub-contractors. Jet Solar may also analyse your regular energy use to determine specific solar energy requirements for your home.

Who owns jet solar?

Melbourne-based Jet Solar, which recently became an Enphase Gold Partner, was founded by electrician Jason Dickinson with just one other employee. Now he heads a team of nine, which includes a Qantas pilot who left the cockpit for the rooftop due to the collapse of international travel. “We have a great little team,” explains Jason.
