

# Laboratory department

## Overview

---

What is the Department of laboratory medicine?

The Department of Laboratory Medicine is staffed pathologists with training and certification in many specialised areas including Clinical Chemistry, Haematology, Microbiology, Transfusion Medicine, Molecular Diagnostics, Cytogenetics, and Flow Cytometry.

What is the government laboratory?

Welcome to the website of the Government Laboratory of the Government of the Hong Kong Special Administrative Region. The Government Laboratory provides a wide range of analytical, investigatory and advisory services and support to other bureaux and departments of the Government of the Hong Kong Special Administrative Region.

What is the Department of laboratory services?

The department of laboratory services was established in 2008 and has grown in strength in the number of samples processed and variety of tests performed. We have a dynamic team of doctors, skilled technicians, and trained paramedic staff.

Who is the head of the Laboratory Department?

The department is headed by Ms. Tina Tiang. For more information about laboratory services, please contact Ms Tina Tiang at Tel: 084 - 330 733 (ext. 49). Nursing Department The Nursing department forms the backbone of patient care services at the medical centre.

What is a clinical laboratory department?

Clinical laboratory departments provide a wide range of laboratory procedures that aid health care providers to diagnose, treat, and manage patients. These laboratories are staffed by medical technologists who test biological specimens collected from patients.

What does the Laboratory Department do?

The Laboratory department takes the lead in creating and utilizing novel analytical and diagnostic techniques, which are rooted in the principles of Predictive, Preventive, Personalized, and Participatory (P4) Medicine. This approach broadens our understanding of disease mechanisms and enhances our analytical expertise.
