Overview

How do I Turn on a PV isolator?

Turn on PV isolator switches between the inverter and array and then on the side of the inverter. Make sure Steps 1 and 2 are running properly before turning on the grid power or generator breaker. Power on the load breakers in the cable box of the inverter and then in the load panel. Danger!.

What should I do if my PV inverter is not working?

Ensure the neutral wire is connected correctly. Disconnect all PV strings from the inverter. If the error persists, contact your supplier. Install the inverter in a place with good ventilation and no direct sunlight. If the installation site is okay, check if the NTC connector inside the inverter is loose.

Should I read this document before installing a photovoltaic (PV) inverter?
