

Lease a solar power plant

Overview

Leasing typically follows these guidelines: The company that provides your lease is responsible for solar panel installation and will provide ongoing system maintenance. In exchange, you sign a contract agreeing to lease the solar panels for a specified period, typically 15 to 25 years, and pay a monthly fee during that time. Can I lease my land for solar power generation?

Landowners interested in leasing their land for solar power generation will need to find out if they have a grid connection located on their land or in the vicinity with surplus power in the local area.

How does a solar lease work?

The solar company conducts feasibility studies to assess the land's potential for solar power generation. If the land meets the requirements, the company will negotiate a lease agreement with the landowner, specifying the lease duration, rental rates, and other terms and conditions. What are the benefits of leasing your land for solar?

.

What is solar land leasing?

Solar land leasing involves granting the rights to develop and operate solar power installations on your land to a solar energy company or developer. Instead of purchasing the land outright, these companies lease the land from you, typically for a long-term period. How does solar land leasing work?

.

How much does a solar farm lease cost?

See below for more on what makes your land ideally suited for a solar farm. Granted your property adheres to all necessary solar farm land requirements, the typical solar farm lease rate varies between \$600 – \$1,200 per acre for every year of your contract.

Why should you Lease Your Land for solar?

OYA Renewables offers competitive solar land leases to farmers and other landowners to develop solar projects. Leasing your land for solar supports your family and your community through jobs, income and cleaner air. Developing and building a solar farm takes strong partnerships and expertise to get from start to finish.

What should a solar lease include?

The lease is also likely to contain covenants (which will bind the solar panel land and any adjoining land in the ownership of the landlord) not to do anything which could damage any electric cables or wires and not to deal with the land in any way that could be detrimental to the solar project.
