

Linked collection of photovoltaic panels crossword clue

Overview

What is a solar panel used for?

It is used as a component in a larger photovoltaic (PV) system to offer electricity for commercial and residential applications. A single solar panel can only produce a limited amount of power, so most installations contain several panels, known as a solar array.

What are assemblies of cells used to make solar panels?

Assemblies of cells are used to make solar panels. Solar Panel - A packaged, interconnected assembly of solar cells also known as a solar module. It is used as a component in a larger photovoltaic (PV) system to offer electricity for commercial and residential applications.

What is photovoltaic effect?

Photovoltaic Effect - Involves the creation of a voltage (or corresponding electric current) in a material upon exposure to electro-magnetic radiation.
