Are lithium batteries good for a motorcycle?

Lithium batteries produce 13.2 volts, delivering better performance to all the voltage-dependent systems on a motorcycle, from the starter motor windings to the coils to the injectors. With the better voltage-stability and slightly higher voltage delivered by lithium batteries, you get a bike that is easier to tune and makes more horsepower.

What is a lithium ion battery?

Lithium-ion batteries represent the next stage of battery technology, and have mostly replaced lead-acid batteries in the aftermarket. Many manufacturers are even using lithium-ion batteries in their motorcycles from the factory, enhancing the reliability and performance of the motorcycles that are fitted with them.

Who makes lithium ion motorcycle batteries?

Dutch firm makes lithium batteries for multiple applications with a large range of motorbike fitments. High performance lithium ion motorcycle batteries designed with the smallest physical size in mind.

Are lithium motorcycle batteries better than lead-acid batteries?

As we said at the beginning of this article, the most common advantage that most riders have heard about lithium motorcycle batteries is that they weigh significantly less than lead-acid batteries. This is true.

Can lithium motorcycle batteries be charged with a regular Charger?

As for charging, lithium motorcycle batteries should not be charged with a regular charger. Instead, use a battery charger specifically designed for lithium batteries. This is because lithium batteries and traditional lead acid batteries have different charging profiles.

Why do motorcycle riders switch to lithium batteries?

Weight: One of the main reasons riders switch to lithium batteries is the significant weight savings. These batteries are typically much lighter than lead-acid batteries, improving the overall performance of the motorcycle.
