

Little Sun Solar Power Plant

Overview

Little Sun sells solar devices to raise funds and make solar lights and chargers available to energy-impoverished rural communities in Africa. Their products include the Little Sun Original lamp, Little Sun Charge phone charger, and the Little Sun Diamond lamp. •  • 

What is the Little Sun solar-powered lamp?

The artist has developed the Little Sun solar-powered lamp with the engineer Frederik Ottesen to focus attention on the power of solar light to improve lives. Around 1.6 billion people worldwide live without access to mains electricity. Many of them rely on kerosene lanterns for lighting, which is both expensive and a health hazard.

Who makes small Solar-powered lamps?

Icelandic artist Olafur Eliasson has made these small solar-powered lamps for people who have limited access to reliable energy – almost a quarter of the world's population (+ movie). Little Sun can produce five hours of light when charged in the sun for five hours. Above image is by Little Sun.

What are little sun LED lights?

The tiny recyclable ABS plastic solar-powered LED lights are composed of a single monocrystalline solar cell that requires only four hours of sunshine to produce five hours of reading light. Using Little Sun lamps instead of kerosene drastically lowers CO2 emissions as well as saving income.

Who is little sun?

A marriage of art and science, Little Sun was founded in 2012 by artist Olafur Eliasson and engineer Frederik Ottesen. Their collaboration produced the Little Sun lamp—a small, portable, solar light—that was first distributed to people living without electricity in Ethiopia.

Where is little sun located?

Little Sun has offices in Berlin and Lusaka. Through our work, we have provided over 1 million personal solar devices to students and teachers, Community Health Workers and midwives, and to refugees and internally displaced people.

What is little sun & how does it work?

Little Sun produces 5 hours of light when it is charged in the sun for 5 hours. It facilitates the creation of small businesses to sell the lamp and, by concentrating profits at the point of need, it aims to promote economic growth in regions of the world where electricity is not available, reliable, affordable, or sustainable.
