

Logitech g305 lithium battery

Overview

What are the lightest/longest lasting batteries to use with the G305?

I've heard that Energizer ultimate lithium AA batteries are the best for battery life/weight but the AAA ones with a converter are the best for weight. What would you guys recommend?

AAA w/ half of adapter if it's your gaming mouse. Balance improves incredibly.

What is Logitech G305 Lightspeed?

Driven by data, run by a passionate team of engineers, testers, technical writers, developers, and more. We are hiring! The Logitech G305 LIGHTSPEED is a wireless gaming mouse with a solid, plastic shell. It connects using a USB receiver and uses a single AA battery for power.

How much does a Logitech G305 weigh?

G305 is very light, coming in at only 99 grams, made possible thanks to the lightweight mechanical design and ultra-efficient battery usage. G305 primary switches, both left and right, are rated for 10 million clicks. G305 also has middle click, DPI button and two side buttons that can be programmed to your preferences using Logitech G HUB.

What if my Logitech G305 mouse battery dies?

Improve this guide by completing or revising its introduction. The Logitech G305 mouse is a gaming mouse that is contoured for comfort and control when gaming. If the batteries die, your mouse will not work. Follow this guide to replace the batteries in your Logitech G305 mouse.

What is a Logitech G305 mouse?

The Logitech G305 mouse is a gaming mouse that is contoured for comfort and control when gaming. If the batteries die, your mouse will not work.

Are there any battery issues with a G305?

No sign of any battery issues yet. Basically the same deal here with my G305, AAA lithium. I'm sure it'll report 20% or so soon even though it's still at 100% after a few months worth of usage. Not that I'm complaining. the power of HERO sensor i guess. Same here Imao, battery has been 100%

[My G305 LiPo mod : r/MouseReview](#)

Get a charge module that has a overdischarge protection, the G305 is able to work with voltages as low as 1.2v and this can cause serious harm to a LiPo (or Li-ion) battery. Since I didn't bother that much with modding anything besides the battery I believe you can go much lower than 82 grams, a smaller capacity battery (mine is 680 mAh) or even a custom battery charge module.

[Logitech G305 Review : r/MouseReview](#)

The Logitech G305, or G304 in some regions, is currently the cheapest Logitech Lightspeed mouse (based on MSRP) available. Been using this since the day one launch with 1 single AA Energizer Lithium battery. Usage more than 10 hours every single day
