

Longi Solar 365W photovoltaic panel

Overview

Great power output and greater energy yields. Outstanding power output in low irradiance conditions, such as dawn, dusk and cloudy days. Positive tolerance of maximal power guaranteed (0~ 5W).

A low 0.55% annual degradation rate after an initial first-year degradation of less than 2% , which is superior to conventional modules.

The module's frame design provides easy installation and ensures robust mechanical strength. It is able to withhold a heavy snow load up to 5400 Pa and wind loads up to 2400 Pa. Added ammonia and salt mist resistance make this.

This module comes with a 10-year product warranty on materials and processing and a 25-year extra linear power output warranty.
