

# Make a solar generator at home

## Overview

---

To distribute power in my homemade solar generator, I used a 6-circuit fuse panel for the positives, and for the grounds, I used a busbar. Fix both of these to the case floor using a hot glue gun. Once the glue dries, I recommend you add another layer of superglue all around the edges. Do the same for the positive inline fuse.

To wire the LED light, you need to shorten the cable just enough to reach the switch. Strip the outer insulation on the end, as well as the insulation of the (+) and (-) wires that are inside. Since the switch also has an indicator light, it.

Take the leads from the 18V socket and connect the charge controller. Now go ahead and connect the charge controller to the fuse box and negative bus bar. Since I used a solar.
