

Mandatory installation of photovoltaic panels on rooftops

Overview

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can a solar panel be installed on a roof?

If you wish to install a solar panel on your roof building regulations will normally apply. The ability of the existing roof to carry the load (weight) of the panel will need to be checked and proven. Some strengthening work may be needed. Building regulations also apply to other aspects of the work such as electrical installation.

When will solar panels be mandatory?

In March 2024, the European Parliament approved a law requiring solar panels on all new residential buildings by 2030. The EU Solar Standard makes it mandatory for member states to gradually include solar installations in new public, commercial, and residential buildings.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system – so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Will homeowners be able to install rooftop solar panels more easily?
