

Manual photovoltaic bracket puncher

Overview

What is a photovoltaic solar module?

Risen's photovoltaic solar module is a DC power supply, which has the character of high reliability and nearly no-maintenance. It can be used in power systems of remote areas, home power systems, renewable energy vehicles, hydropower stations, water pumps, communication system or constitute solar photovoltaic power station directly.

How to maintain a photovoltaic system?

Warning: Any electrical maintenance must shut down the PV system firstly. Improper system maintenance may cause fatal dangers such as electric shock and burning. Dust accumulation on the glass surface of the module will reduce its power output and may cause hot spots. So the surface of photovoltaic modules should be kept clean.

How to clean a PV module?

Clean PV modules when the irradiance is below 200W/m². Liquid with a large temperature difference compared to modules shall not be used for cleaning. For example, do not use cold water to clean the module when the temperature of it is high during the day, otherwise there will be the risk of module damage.

What happens if solar photovoltaic module part by Shadow block?

If solar photovoltaic module part by shadow block, which can lead to reverse voltage related to solar cells, solar photovoltaic modules in other unaffected battery string or other solar PV modules in the system and current will force through keep out part of the power loss and heat affected cell.

What are the different types of PV support system?

The PV support system is generally divided into fixed installation system and tracker system. Risen PV module can be installed on two systems. The PV

module and support system can be connected by bolts and clamp. Risen recommends some installation methods and accessories, as follows, please give priority.

Who is responsible for the maintenance of PV modules?

The inspection and maintenance of modules in the PV array shall be carried out by personnel who have received professional PV system maintenance training and obtained relevant qualifications and authorization. PV module that that cannot be used due to a malfunction should be deactivated.
