

Matrix Solar Support

Overview

What is the EIB partnering with matrix renewables?

We are thrilled to announce that the European Investment Bank (EIB) has signed a €50 million green loan with Matrix Renewables to deploy 5 new solar photovoltaic plants in Spain. The projects will be installed in the Castilla León and Extremadura regions, with an installed capacity of 240 MW and are expected to be operational by the end of 2025.

How many solar projects does matrix own?

Matrix owns a pipeline of approximately 7 GW of projects in operation and various stages of construction and development in the U.S. and approximately 14 GW of solar power, battery storage and green hydrogen projects globally. Matrix selected SOLV Energy as the EPC and O&M partner on the project.

What is matrix renewables?

Matrix Renewables's current portfolio is comprised of 14,5 GW of operational, under construction, near ready - to - build, or under development renewables energy projects, storage and Green Hydrogen projects across Europe, US and Latin America.

When will matrix's solar modules be delivered?

The modules, which will be delivered between 2024 and 2027, will power Matrix projects in the United States and Spain. This marks Matrix's first order for First Solar's responsibly produced ultra-low carbon photovoltaic technology.

What is first solar & matrix renewables doing?

First Solar and Matrix Renewables today announced a framework agreement to procure approximately 2.1 gigawatts of advanced thin film modules. The modules, which will be delivered between 2024 and 2027, will power Matrix projects in the United States and Spain.

Why is matrix partnering with First Solar?

“Matrix is the latest in a number of large IPPs, in the US and internationally, that are choosing to partner with First Solar not just on the strength of our technology and competitiveness, but also because we share the same values,” said Georges Antoun, chief commercial officer, First Solar.
