

Microgrid Laboratory Internship

Overview

What is the microgrid Research Laboratory (mglab)?

The Microgrid Research Laboratory (MGLab) is a world class proof-on-concept which facilitates the real-time control, operation, and optimal energy management of renewable energy integration together with energy storage systems and consumption.

Where can I get a summer research internship in Germany?

For more information visit the Shanghai Jiao Tong University Summer Research Internship Program website. RISE Germany offers undergraduate students from North American, British and Irish universities the opportunity to complete a summer research internship at top German universities and research institutions.

How long is a summer research internship?

The internships are usually six weeks and students will also have chance to collaborate on the paper-writing process and serve as a co-author on a publication. Please see the eligibility criteria for strict requirements. For more information visit the Shanghai Jiao Tong University Summer Research Internship Program website.
