

Microgrid construction winning bid announcement

Overview

Will there be a second round of bidding for microgrid systems?

THE Department of Energy (DoE) on Wednesday said it targets to conduct a second round of bidding for microgrid systems service providers within the year. This came after the DoE awarded the development of microgrid systems in eight unserved areas in the provinces of Cebu, Quezon, and Palawan to the Maharlika Consortium.

How many new green infrastructure projects have been delivered?

In a key milestone towards delivering clean power by 2030, the latest auction round delivered 131 new green infrastructure projects. This makes it the biggest round ever with significant numbers for onshore wind, solar and tidal energy, which will power the equivalent of 11 million British homes.

What are the results of the 2023 offshore wind auction?

The results are a marked improvement on the previous auction round in 2023, which saw zero offshore wind projects agreed. These successful results come after the government last month moved quickly to increase the budget by 50% - a record funding uplift and 7 times bigger than the previous round's pot.
