## Overview

---

What is the global microgrid market size?

The global microgrid market size was estimated at USD 76.88 billion in 2023 and is expected to grow at a compound annual growth rate (CAGR) of 17.1% from 2024 to 2030. Rising power demand in developing countries including Mexico, China, India, and Russia as a result of growth in household and industrial sectors is expected to be a driving force.

What trends will we see in demand-side flexibility programs & microgrids in 2024?

Here are the top trends we expect to see in demand-side flexibility programs and microgrids in 2024: One of the biggest reasons more organizations are deploying microgrids is the growing availability of battery electric storage systems (BESSs).

Are microgrids the future of energy?

The future of energy is here: microgrids and demand-side flexibility programs continue to usher in innovations that trend toward a better tomorrow. Here are the top trends we expect to see in demand-side flexibility programs and microgrids in 2024:.

How will a microgrid change the world in 2024?

This will enable more small and medium-sized commercial and industrial customers to afford the benefits of microgrids. The standardization breakthroughs that occurred in 2023 will continue in 2024, driving exponential growth in investment and innovation across an expanding ecosystem of system vendors and integrators.

Why are more organizations deploying microgrids?

One of the biggest reasons more organizations are deploying microgrids is the growing availability of battery electric storage systems (BESSs). They multiply

the benefits of microgrids, allowing enterprises to integrate more renewable resources and make the best use of on-site energy.

How can microgrids be more affordable?

The trend with the most potential to make microgrids more affordable, quick to deploy, and ultimately ubiquitous is standardization. The evolution of microgrids from unique, custom-engineered projects into modular, repeatable systems - conceived and deployed in months instead of years - will be the key to faster adoption.
