

Miscellaneous lithium battery label

Overview

There are many rules and regulations in place when it comes to applying battery labels to packages containing lithium batteries for transport.

So why do you have to jump through hoops when shipping lithium batteries?

Like we mentioned above, they pose very real safety issues. It's why.

First things first: you need to know which kind of lithium battery you are shipping. There are 2 classification types of lithium batteries: lithium metal and lithium ion. And depending on the type will determine the specifications and regulations you need to follow.

Packing Instructions (PI) are just another piece of the battery label puzzle. They were created and implemented by the International Air Transport Association (IATA). Specifically, for.

Now that you know the different lithium batteries types, you'll have a better idea of which labels your package will need. So how do you illustrate the battery material being shipped?

There's a system in place for this exact purpose: 1. The UN rating system. It was developed.

Do I need a label for lithium ion batteries?

If you're shipping lithium ion batteries contained in or packed with equipment, use a battery label with UN3481. Lithium metal batteries will use labels with one of the following UN numbers: If you're shipping lithium metal batteries as a standalone (no other items in the package), use a battery label with UN3090.

Can you leave a class 9 miscellaneous label on a lithium battery?

The DOT has issued an interpretation letter that permits shippers of lithium batteries to leave the Class 9 miscellaneous label still affixed to the package and still take advantage of the exceptions offered for domestic ground shipping in the 48 contiguous states.

Where can I find the lithium battery marking and labeling guidelines?

You can find the lithium battery marking and labeling guidelines inside Section 7 of the latest copy of the Dangerous Goods Regulations (DGR) or the Lithium Battery Shipping Regulations (LBSR). What do the Lithium Battery Marks and Labels Look Like?

The lithium battery mark is required as specified in the DGR.

What is a lithium battery label?

Labels are printed with the letters 'UN' and a 4-digit number. Think of it like a special code. These numbers clarify 2 types of crucial information: the lithium battery type and packaging method. Packaging method refers to how the lithium batteries are being shipped. This can be done in 3 ways:.

How do I choose a lithium battery shipping label?

1. Determine the correct shipping label: Choose the appropriate label depending on the type and quantity of lithium batteries being shipped. Labels should be easily visible and prominently displayed on each package.
2. Check the UN number: Verify that the UN number on the label matches the specific type of lithium battery being transported.

Are there industry standards for lithium battery labeling?

Yes, there are industry standards for lithium battery labeling, such as the UN Model Regulations and the ICAO Technical Instructions, which provide guidance on labeling requirements for transportation. [Share This Story, Choose Your Platform!](#)
