

# Mobile ESS unit cost breakdown in Saudi Arabia 2026

## Overview

---

Will Saudi Arabia be the third biggest Bess market in 2026?

However, if you add up the numbers for Saudi Arabia (KSA) alone, we end up at 13 GWh of grid-scale BESS operational or in construction already today. And if we add recent tenders, this will lead to a whopping 33.5 GWh of BESS capacity by 2026. This would make KSA the third biggest global BESS market after the USA and China.

Who is acquiring a Bess project in Saudi Arabia?

Most of the projects are expected to be procured by government-owned public entities, such as SPPC, SEC, EWEC and ENOWA (NEOM). The Saudi Electricity Company (SEC) awarded a 7.8 GWh BESS contract to Al Gihaz (using a Sungrow BESS) in Q2 2024 with commissioning expected in 2025.

What is the projected growth rate of Saudi Arabia's construction market?

Projections: The construction market is expected to grow at a compound annual growth rate (CAGR) of 5.37%, reaching \$91.36 billion by 2029. Saudi Arabia's construction sector continues to exhibit stability in the face of global supply chain disruptions.

Will SEC tender a GWh Bess in 2024?

Furthermore, SEC is tendering a 12.5 GWh BESS on a split scope basis across five sites in KSA expecting to close in the fourth quarter of 2024. The Saudi Power Procurement Authority (SPPC) is planning annual standalone BESS tenders of 2 GW / 8 GWh from 2024 onwards, totalling 10 GW / 40 GWh by 2030.

How does Bess procurement work in the UAE?

In the UAE, Emirates Water and Electricity Company (EWEC) issued in July 2024 a RfP for a 400 MW / 400 MWh standalone BESS project. These offtakers conduct BESS procurement either through the EPC route, where they procure

the BESS product, or via the IFP route, where they procure flexibility services.
