

Musk interviews solar power

Overview

Why is Elon Musk interested in solar?

Elon Musk admires the sun as an almost infinitely plentiful source of energy. His solar projects reflect his interest, and the cost of solar is lower than ever before. A strategic installation of the right solar panels could easily power the entire world.

Does Elon Musk support nuclear energy?

Elon Musk (@elonmusk) January 31, 2023 Though Elon Musk's company Tesla offers both solar and battery-based energy storage solutions, he is also a long-time proponent of nuclear energy.

Will Elon Musk reshape the energy grid?

Here's how. Elon Musk has a radical plan to reshape the energy grid — and it could protect against power cuts. During Tesla's first-quarter 2021 earnings call Monday, the CEO described how the firm's solar panels and batteries can work together to "operate as a giant distributed utility."

Does Elon Musk say the sun can power all civilizations?

Elon Musk Says the Sun Can Power All of Civilization. Of Course He's Right. It's a free fusion reactor in the sky. Now how do we catch it?

Gear-obsessed editors choose every product we review. We may earn commission if you buy from a link. Why Trust Us?

Elon Musk admires the sun as an almost infinitely plentiful source of energy.

Does Elon Musk really need batteries?

"Absolutely," Musk responded. "We need batteries, but yes." Musk explained that "it's not hard" and "very feasible" to power the entire country with solar because the sun is converting more than four million tons of mass to energy

every second and requires no maintenance. “That thing just works. We have a giant fusion reactor in the sky,” he said.

Who is Elon Musk?

Billionaire entrepreneur Elon Musk has once again championed the incredible potential of renewable energy.
