

Navajo coal plant solar replacement inverters

Overview

Is the Navajo Nation Turning to renewables?

After decades of dependency on coal for jobs, the Navajo Nation is turning to renewables. Two utility-scale solar farms have been built in recent years and another one is in the works. The Navajo and Hopi have fought hard to hold on to coal. Three generations have worked for the West's largest coal-fired power plant, the Navajo Generating Station.

Will Navajo Power a coal plant?

The Navajo Generating Station promised to take the traditional coal plant and supersize it, employing state-of-the-art generators to produce 2,250 megawatts of power, more than all but a handful of the operating plants in the nation at the time.

Can solar power help Navajo people build jobs?

The Kayenta solar farms on the Navajo Nation, shown here in 2019, span 365 acres and produce 55 megawatts of power that supply enough electricity to power 36,000 homes. Renewable energy such as solar power is drawing increasing attention in tribal communities as a way to build jobs for the future.

Why did the Navajo Tribe Create A solar power plant?

To compensate for energy production lost because of the closure of the mine, the Navajo Nation created a solar power plant located in Kayenta, Arizona. The Navajo Tribal Utility Authority's Kayenta Solar Project is the largest solar project on the reservation.

Will the Navajo Nation get solar panels?

The U.S. Department of Energy announced Wednesday a multimillion-dollar investment to help provide hundreds of homes on the Navajo Nation with solar panels.

What is the largest solar project on the Navajo reservation?

The Navajo Tribal Utility Authority's Kayenta Solar Project is the largest solar project on the reservation. This project was built in two phases consisting of two fields of fixed sun tracking panels known as Kayenta 1 and Kayenta 2. The Kayenta 1 field has 120k panels, while Kayenta 2 has only 100k.

Navajo coal plant solar replacement inverters

The Navajo Nation's transition to renewable energy: what and ...

Glen Steiger, project manager for the Kayenta Solar Project, said the plant produces up to 55 megawatts of energy, which is more than enough to power the entire chapter of Kayenta. Steiger, who is also an executive consultant at the Navajo Tribal Utility Authority

The Navajo Generating Station Coal Plant Officially Powers
