

New Energy Storage Financing Leasing Program

Overview

Why do energy storage projects need project financing?

The rapid growth in the energy storage market is similarly driving demand for project financing. The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects.

Can you finance a solar energy storage project?

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

Can you finance a battery storage project?

Energy can be stored in a number of ways, depending on the source, but the most common is in chemical batteries. In this briefing, we look at some of the considerations for financing battery storage projects. Why chemical batteries?

Chemical batteries are ideal for energy storage for a number of reasons: They are easily scalable.

How do we finance the storage of electricity?

While financing the storage of electricity has often been carried out on a low-leveraged, corporate or portfolio basis, as the size of battery projects increases, we are now seeing more typical SPV non-recourse project finance structures, with a full security package.

Will a tax credit be available for energy storage projects?

However, with the passage of the Inflation Reduction Act of 2022, tax credits are now available for standalone energy storage systems, and thus lenders may be willing to provide bridge capital that is underwritten based on the

receipt of proceeds from an anticipated tax equity investment, similar to renewable energy projects.

What is the long duration energy storage Investment Support Scheme?

Long Duration Electricity Storage investment support scheme will boost investor confidence and unlock billions in funding for vital projects. The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure.
