

# **New Energy Storage Industry City Ranking**

## Overview

---

What is the future of energy storage in China?

In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. 2023 was a breakthrough year for industrial and commercial energy storage in China. Projections show significant growth for the future.

Which energy storage companies have installed the most energy?

Together, the top five have installed more than a quarter of the energy storage currently in operation globally. The top five in terms of installed projects (that is, projects completed as of July 2023) are, in descending order: Sungrow, Fluence, Tesla, Wärtsilä and Hyperstrong.

Will energy storage costs remain high in 2023?

Costs are expected to remain high in 2023 before dropping in 2024. The energy storage system market doubles, despite higher costs. The global energy storage market will continue to grow despite higher energy storage costs, adding roughly 28GW/69GWh of energy storage by the end of 2023.

Will commercial and industrial energy storage systems become more profitable by 2030?

According to the latest research, by 2030 it will be much more straightforward for commercial and industrial energy storage systems to participate in spot markets and provide ancillary services, leading to substantial revenue growth.

Is energy storage advancing in the industrial sector?

The World Economic Forum has brought together three perspectives on advancing energy storage deployment in the industrial sector. Gao Jifan, Chairman and Chief Executive Officer, Trina Solar Under the new development trends, the energy storage industry needs a higher quality and more

advanced upgrade than ever before.

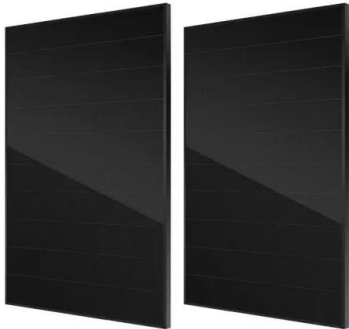

How many new energy storage projects are commissioned in China?

Figure 2: Cumulative installed capacity of new energy storage projects commissioned in China (as of the end of June 2023) In the first half of 2023, China's new energy storage continued to develop at a high speed, with 850 projects (including planning, under construction and commissioned projects), more than twice that of the same period last year.
