

# **New OTC Market Hairun Photovoltaic Recent Situation**

## Overview

---

What percentage of PV production came online in 2023?

30%-40% of polysilicon, cell, and module manufacturing capacity came online in 2023. In 2023, global PV production was between 400 and 500 GW. While non-Chinese manufacturing has grown, most new capacity continues to come from China. Analysts project that it may take years for production to catch up with capacity.

What was the global PV production capacity in 2023?

Accessed March 21, 2024 ; EIA "Annual Energy Outlook 2023." Accessed March 21, 2024. At the end of 2023, global PV manufacturing capacity was between 650 and 750 GW. 30%-40% of polysilicon, cell, and module manufacturing capacity came online in 2023. In 2023, global PV production was between 400 and 500 GW.

What are the trends in solar PV technology?

A steady trend in technology improvements is observed, with crystalline solar PV being the dominant technology in the market. Increasing scales of production have also led to significant cost reductions in the per watt cost of solar modules.

How has solar PV industry changed over the past decade?

Global cumulative investment in solar PV manufacturing facilities doubled in the past decade amounting USD 100 billion in 2021 increasing by 50% during 2014-21 as compared to 2008-14. Additionally, the solar supply chains is highly concentrated in China, and there is need for diversification across the regions.

How big is the solar PV market in 2021?

The market size in 2021 represents a 18% increase from 2020 and a 445% growth compared to 10 years earlier. The analysis also highlights that, on

average, 119 W of solar PV are installed per every individual in the world, 20 points increase from 2020.

Which region is leading the solar PV market in 2021?

Initially driven by European installations, since 2012 the market has been led by the Asia-Pacific region, which accounted for 57% of annual additions in 2021, and 59% of the global PV fleet. With a 37% compound annual growth rate (CAGR), solar PV emerged as the fastest growing energy technology and the one with the brightest prospects.

## New OTC Market Hairun Photovoltaic Recent Situation
