

New district relocation of graves to install photovoltaic panels

Overview

Should Valencia install solar panels in its cemeteries?

Valencia is not the first place to install solar panels in its cemeteries, with a commune in France launching a project in 2021 to transform its graveyard into a renewable energy hub. Saint-Joachim in the west of the country plans to install 5,000 panels by next year at a cost of around €3.3 million (£2.8m).

How many photovoltaic panels are being placed in public cemeteries in Valencia?

Around 7,000 photovoltaic panels have been placed on crypts and other structures in public cemeteries in Valencia, according to a European Union fact sheet that details the project. "These public spaces offer plenty of space for the generation of clean energy," the fact sheet states.

Can solar panels be installed in a conservation area?

To increase the chances of your solar panel installation being approved in a conservation area, you can make a few upfront choices, such as: Selecting solar panel styles that blend in with your roof or building's design, such as solar tiles. Black solar panels tend to look much more appealing than blue.

Can solar panels be installed next to a monument?

The key is to ensure your installation won't harm the area's special appearance or historical significance - so, for example, a proposal to put solar panels on a building next to a monument will most likely be unsuccessful.

Are solar panels an eyesore in a conservation area?

Each conservation area might have its own specific set of rules, and it's their job to evaluate your plans. The solar panels should blend in with the existing architecture, so no-one can call them an eyesore. When you apply for planning permission, your neighbours may object to your solar panel plans.

Will 68 solar panels be installed at a West Sussex farm?

Plans to install 68 solar panels at a West Sussex farm working towards net zero have been submitted to a council. The Woodhorn Group submitted the proposal to Chichester District Council for Reeds Farm, Oving. Panels would be installed in a yard that has stored farming equipment and silage bales for more than 50 years.
