Overview

What is Ningdong photovoltaic base?

On February 24, the 100MW/200MW energy storage station of Ningdong Photovoltaic Base under Ningxia Power Co., Ltd. (“Ningxia Power” for short), a subsidiary of CHN Energy, was connected to the grid, marking that CHN Energy’s largest centralized electro-chemical energy storage station officially began operation.

How many kilowatts a photovoltaic system is in Ningdong?

The 500,000 kilowatts photovoltaic systems of CHN Energy Investment Group (CHN Energy) Guohua Energy Investment's Ningdong Renewable Hydrogen and Carbon Emission Reduction Demonstration Project passed the maximum power output test of the Ningxia Power Grid Control Center, confirming that the project has been connected to the grid at full capacity.

What is Ningxia power's energy storage station?

The energy storage station is a supporting facility for Ningxia Power’s 2MW integrated photovoltaic base, one of China’s first large-scale wind-photovoltaic power base projects. It has a planned total capacity of 200MW/400MW, and the completed phase of the project has a capacity of 100MW/200MW.

What is CHN energy's new photovoltaic base project?

It was constructed in conjunction with the CHN Energy’s East Ningxia 1.5 GW Composite Photovoltaic Base Project, with a planned total capacity of 200 MW/400 MWh.

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW

large-scale wind and photovoltaic bases nationwide.
