

# **Nova scotia power solar**

## Overview

---

How does a solar garden work in Nova Scotia?

They work best in full sun, but will also produce electricity on cloudy days. In a solar PV system, the electricity generated is first used on site and any excess is sold to Nova Scotia Power. A solar garden is a simple way for all Nova Scotians to have access to solar energy, without having to install their own panels.

Does Nova Scotia offer solar rebates?

Efficiency Nova Scotia offers incentives to homeowners for solar PV systems to make solar electricity more affordable than ever. The SolarHomes program helps Nova Scotians harness the sun's energy by offering rebates on approved solar PV systems up to 10kW in size. Full program terms can be found here: [SolarHomes Terms & Conditions](#).

How much electricity can a solar system produce in Nova Scotia?

According to data from Natural Resources Canada, the average solar system in Nova Scotia can produce 1090kWh of electricity per kW of solar panels per year. Here is how much an average solar system can produce each month, as well as the solar irradiance potential map for Nova Scotia:.

Is Nova Scotia a good province to install a solar power system?

Last updated Sep 9, 2023. Nova Scotia is ranked the #6 province in the country for installing a solar power system, scoring as one of the best provinces for rebates, financing options, and installation costs.

Why should Nova Scotia add more solar electricity?

Nova Scotia is a national leader in reducing greenhouse gas emissions, and we remain committed to fighting climate change. Adding more solar electricity to our grid will build on our successes, give everyone more choice for clean, affordable renewable electricity and help grow businesses and create new

jobs.

What is Nova Scotia's solar energy program?

This program creates the opportunity to buy solar energy from a community provider instead,” said Tory Rushton, Minister of Natural Resources and Renewables. “This is just one of the many changes we’re making to give Nova Scotians clean, reliable power at affordable rates, while helping us reach our climate change goals.”

## Nova scotia power solar

---

### Government Committed to Solar Power, Open , Government of Nova Scotia

Many Nova Scotians have made their feelings known about Nova Scotia Power's application to increase electricity rates by 10 per cent and increase the cost for solar power. Solar customers and installers are justifiably concerned for the survival of the province's solar industry.
