---

### [The electricity grid , Gen Less](#)

The renewable electricity mix In a typical year, New Zealand generates around 80-85% of its electricity from renewable energy sources including hydro, geothermal and wind. The other 15-20% is generated from burning fossil fuels such as coal, gas and oil. Our

### Renewable energy , EECA

While around 80-85% of our electricity generation is currently from renewable sources, we are reliant on fossil fuels for 99% of transport energy and around 60% of industrial energy. Across the economy we will need to utilise a mixture of different renewable energy sources, so that we can meet energy demand in the long term and ensure a secure and affordable energy supply.

### Genesis Energy has target of 95% renewable generation

Renewables Johns said the company had a target of 95 percent renewable generation by 2035, which would be needed to electrify the economy and achieve zero-carbon goals by 2050. "New Zealand needs to move from 40 percent of energy drawn from electricity

### New Zealand progressing at pace towards a highly renewable ...

New Zealand is transitioning to a highly renewable electricity system. This change will require increased and accelerated investment in

### **Can NZ hit its renewable electricity goal? , RNZ**

New Zealand's set an ambitious target of reaching 100 percent renewable electricity generation by 2030. The government's first emissions reduction plan, released earlier this month, gave an indication of the roadmap to this aspirational goal, with a plan to ban electricity companies from investing in new generation from fossil fuels.

### [Renewable energy supply in 2021](#)

Renewable energy supply in 2021. Avoided emissions based on fossil fuel mix used for power. Calculated by dividing power sector emissions by elec. + heat gen. RENEWABLE RESOURCE ...

[What's renewable energy? . Meridian Energy](#)

Meridian Energy is a New Zealand power company that generates electricity through 100% renewable sources - wind, water and sun. We believe it's the only way forward for people and the planet. 0800 496 496 hello@meridian .nz

**Total renewable energy used to generate electricity in ...**

Wind energy used to generate electricity 1990-2023 Renewable energy as a percentage of total supply 1990-2023 Direct use of renewable energy By sector, 2013 & 2023 Solid biofuels energy used to generate combined heat and power ...

**Renewable Energy**

Renewable energy sources are growing quickly and will play a vital role in tackling climate change. Share of primary energy that comes from hydropower This interactive chart shows the share of primary energy that comes from hydropower. Note that this data is

**New Zealand progressing at pace towards a highly renewable ...**

As part of the Electricity Authority's ongoing work to improve visibility of data on new generation investment, we commissioned Generation Investment Surveys in 2022 and 2023. This article explores the uplift of 5.5TWh of new committed electricity generation between ...

## Executive summary - New Zealand 2023 - Analysis

Reaching the aspirational 100% target for renewables in electricity by 2030 and the 50% economy-wide renewables target by 2035 will require a massive buildout of new renewables generation capacity. Given limited options for large new hydro capacity and modest volumes of economically feasible geothermal, a sizeable share of the required new capacity will need to ...
