### OECD renewable primary energy supply by product, 2000-2020

OECD renewable primary energy supply by product, 2000-2020 - Chart and data by the International Energy Agency. About News Events Programmes Help centre Skip navigation Energy system Explore the energy system by fuel, technology or sector Transport

### the mediating role of renewable energy and carbon taxes

The exceptional rise in overall economic activities has deteriorated environmental sustainability around the world. However, countries around the globe are implementing strategies for reaching the global climate objective. For this purpose, OECD countries committed many efforts, although their pledges and results are not parallel to the ...

### Renewables 2020 : Analysis and forecast to 2025

The annual Renewables Market Report assesses the current state of play of renewable energy, identifying the main drivers and barriers to deployment and projecting renewable energy ...

### The impact of economic globalization on renewable energy in the ...

This paper analyzes the determinants of renewable energy consumption in the panel data of 30 OECD countries for the period from 1970 to

2015. The unique role is given to ...

### Introduction: key trends and market developments for renewable energy

The Philippines has set a goal to achieve a 35% share of renewable energy in its power generation mix by 2030 and 50% by 2040, up from 22% currently. In parallel, the Philippines aims to reduce its economy-wide energy intensity by 3% over the same

### OECD : Renewables supply and consumption

This comparative tables presents figures on the renewable energy supply and consumption market amongst OECD member countries by analyzing renewable products in terms of production, import and exports. 1887 ABOUT CONTACT US ALERTS HELP Login

### Cities, Towns and Renewable Energy

This book includes several case studies chosen to illustrate how enhanced deployment of renewable energy projects can result from local policy regardless of a community's size or location. As the trend towards the international dispersion of certain value chain

### Enhancing climate action in OECD countries: the role of ...

OECD nations can invest in renewable energy infrastructure and offer subsidies for individuals and businesses to transition to renewable energy sources. National governments must adopt explicit, translucent, and comprehensive policy structures that are in line with global climate change and the SDGs to ensure that their policies, investments, and practices are ...

### Renewables Information

The International Energy Agency's annual Renewables Information brings together in one reference volume essential statistics on renewables and waste energy sources. Part I of the publication provides a statistical overview of the previous year's developments in the markets for renewables and waste in the OECD member countries. It also provides selected renewables ...

### OECD : Net capacity of renewables (Edition 2023)

This comparative table comprises statistics about net capacity of renewables in MWe terms. Renewable electricity and heat generation are derived from solar thermal, geothermal, hydro, wind.

### [Renewables 2024 - Analysis](#)

Renewables 2024 - Analysis and key findings. A report by the International Energy Agency. This edition of the IEA's annual Renewables market report provides forecasts for the deployment of renewable energy technologies in electricity, transport and heat to 2030

## Renewable energy consumption and economic growth in OECD ...

Based on the situation that traditional energy is replaced by renewable energy, this paper investigates whether there is a non-linear relationship between renewable energy ...

## [Renewable Energy Market Update](#)

Renewable electricity capacity additions broke another record in 2021 and biofuels demand almost recovered to pre-Covid levels, despite the continuation of logistical challenges and increasing prices. However, the Russian Federation's (hereafter, "Russia") invasion of Ukraine is sending shock waves through energy and agriculture markets, resulting in an unprecedented ...

## Working Party on Climate, Investment and Development Mean renewable

ENV/EPOC/WPCID(2018)15 3 MEAN RENEWABLE ENERGY FEED-IN TARIFFS Unclassified Hascic, I., M. Cárdenas Rodríguez, R. Jachnik, I. Silva and N. Johnstone (2015), Public Interventions and Private Climate Finance Flows: Empirical Evidence from

## Enhancing climate action in OECD countries: the role of ...

OECD countries need to enhance the consumption of renewable energy sources including wind, solar, hydro, and geothermal power to reduce GHG emissions effectively. ...

Biodiversity, water and ecosystems , OECD

All life on Earth depends on biodiversity and water. Yet these invaluable natural resources are under increasing threat from multiple pressures caused by human activities. OECD analysis on biodiversity, covering both species and ecosystems, and water supports governments in developing policies that yield greater environmental benefits in a cost-effective and inclusive way.

Renewable Energy Market Update

This report is a market update on the IEA's most recent five-year renewable energy forecast, Renewables 2019, published in October 2019. It provides an early analysis of the drivers and challenges since last October, and covers renewable capacity additions for all technologies and transport biofuel production expected during 2020 and 2021. An update on renewable heat ...

**Renewable energy consumption (% of total final energy ...**

Renewable energy consumption (% of total final energy consumption) - OECD members from The World Bank: Data Free and open access to global development data Data This page in: English Español Français ??????? ?? Renewable energy consumption

**Trends, investor types and drivers of renewable energy FDI**

As foreign direct investment (FDI) can help mitigate the repercussions of climate change, understanding what factors attract energy FDI is important. A large share of energy FDI originated from outside the energy sector, and given that renewable power FDI also comes from outside the energy sector, it is worthwhile to examine if

drivers behind this type of FDI differ from what ...

### [Renewable energy statistics 2024](#)

The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable energy statistics 2024 provides datasets on power-generation capacity for ...

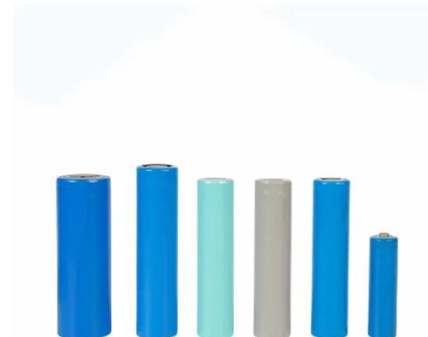

### Renewable Energy

Renewable energy sources are growing quickly and will play a vital role in tackling climate change. Share of primary energy that comes from hydropower This interactive chart shows the share of primary energy that comes from hydropower. Note that this data is

### Renewable Energy Market Update : Outlook for 2022 and 2023

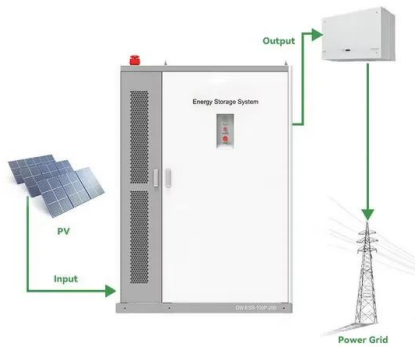

Renewable electricity capacity additions broke another record in 2021 and biofuels demand almost recovered to pre-Covid levels, despite the continuation of logistical challenges and increasing prices. However, the Russian ...

### Green finance, renewable energy and carbon neutrality in OECD ...

This paper aims to explore the impacts of green finance and the adoption of renewable energy on the OECD member states' carbon neutrality. To this end, this research makes contributions to current studies in mainly two aspects: one is devising the new [15

### Renewable energy

Renewable energy (or green energy) is energy from renewable natural resources that are replenished on a human timescale. and that in non-OECD countries, the lifetime savings of 2022 capacity additions will reduce costs by up to \$580 ...

### Mainstreaming Biodiversity into Renewable Power Infrastructure

This report synthesises evidence on biodiversity impacts from renewable power infrastructure, with a focus on solar power, OECD Guidelines on Corporate Governance of State-Owned Enterprises 2024 Data Data Browse all data Data Dashboards Methods

### Energy innovation investment and renewable energy in OECD ...

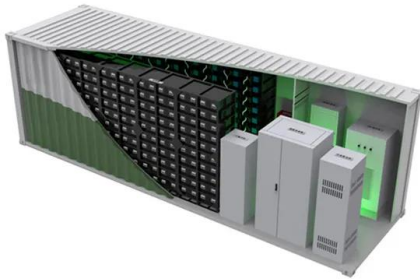

The results, hence, suggest that at an aggregated level, energy innovation may not be sufficient to stimulate total renewable energy in OECD countries except for gas production. Table 7. The impact of energy innovation on renewable energy [FMOLS results]. -0.

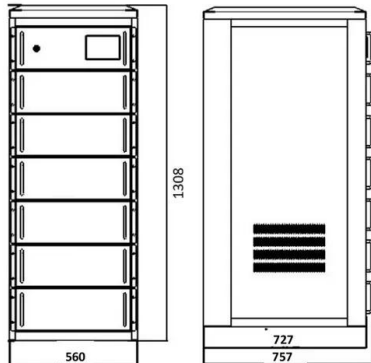

### Renewables Information

OECD and selected countries renewables balance  
This file contains energy balances in matrix form (18 product categories and 78 flows). Data are in ktoe and TJ. It includes as well the electricity and heat output by type of producer (10 flows), in GWh and TJ. It

### Renewables 2021 : Analysis and forecast to 2026

Renewables 2021 is the IEA's primary analysis on the sector, based on current policies and market developments. It forecasts the deployment of renewable energy ...

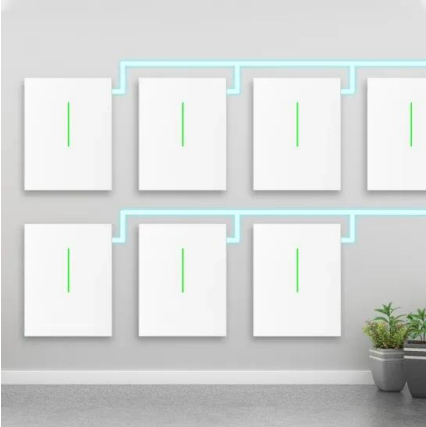

### Renewables 2020 : Analysis and forecast to 2025

In May 2020, the IEA market update on renewable energy provided an analysis that looked at the impact of Covid-19 on renewable energy deployment in 2020 and 2021. This early assessment showed that the Covid-19 crisis is hurting - but not halting -

### Green finance, renewable energy and carbon neutrality in OECD ...

Many countries have committed to reducing carbon emissions based on an international roadmap entitled "carbon neutrality." This study empirically investigates the effects ...

### **Projected Costs of Generating Electricity 2020 - Analysis**

This joint report by the International Energy Agency and the OECD Nuclear Energy Agency is the ninth in a series of studies on electricity generating costs. As countries work towards ensuring an electricity supply that is reliable, affordable and increasingly low carbon, it is crucial that policymakers, modellers and experts have at their disposal reliable information on ...

### **Trends, investor types and drivers of renewable energy FDI , OECD**

As foreign direct investment (FDI) can help mitigate the repercussions of climate change, understanding what factors attract energy FDI is important. A large share of energy FDI originated from outside the energy sector, and given that renewable power FDI also
